

openIDL ND UIM POC - Business Continuity / Disaster Recovery Policy

- [Scope](#)
- [Backup and Recovery of Data](#)
- [Backup and Recovery of a Node](#)
- [Backup and Recovery of the Network](#)

Scope

This Business Continuity / Disaster Recovery Plan shall apply for the duration of the ND UIM POC

Backup and Recovery of Data

For the purpose of the ND UIM Proof of Concept, there will be no backups made of the data.

If the data is somehow lost, we will replace it with new data from the original files.

Backup and Recovery of a Node

For the purpose of the ND UIM Proof of Concept, there will be no recovery of a node.

If a node becomes unusable for any reason, we recreate the node or set up a new one.

Backup and Recovery of the Network

For the purpose of the ND UIM Proof of Concept, there will be no recovery of the network.

If the network becomes unusable, we will recreate the network from scratch.

This will necessitate the reloading of any previous data by affected nodes.
