

2022-8-19 Meeting Agenda

Date

19 Aug 2022

Antitrust Policy Notice

Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at <http://www.linuxfoundation.org/antitrust-policy>. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrave of the firm of Gesmer Updegrave LLP, which provides legal counsel to the Linux Foundation.

This is a weekly series for The Regulatory Reporting Data Model Working Group. The RRDMWG is a collaborative group of insurers, regulators and other insurance industry innovators dedicated to the development of data models that will support regulatory reporting through an openIDL node. The data models to be developed will reflect a greater synchronization of data for insurer statistical and financial data and a consistent methodology that insurers and regulators can leverage to modernize the data reporting environment. The models developed will be reported to the Regulatory Reporting Steering Committee for approval for publication as an open-source data model.

openIDL Community is inviting you to a scheduled Zoom meeting.

Goals

Meeting Minutes

I. Opening Remarks

A. Greetings

B. LF Antitrust Policy read by Mr. Antley

II. Agenda

A. Auto Coverage Report - Private Passenger Auto

1. Basic Review of Report and Various Coverages/Subcoverages

2. Recap

a. Calculations for earned premium, incurred loss

b. Now on incurred count

3. Incurred count

a. Extraction pattern presented - anything from code 2, 3, 6, 7, find records, and utilize set data object to find unique IDs. Scroll through and find unique occurrences, greater than start date, < end date.

b. Car years - working on this now. A little trickier. Back to discussion about earned premium - some normal, some cancellation with negative amount. When a cancellation is issued, months covered is updated to amount of months left to be covered.

This usually equates to one month.

4. More broadly, Mr. Antley has been working with AWG to bring infrastructure documentation up to date. Planning on getting data engineer to work with him to speed up extraction process. Optimistic that car years will be done by 8/26/22.

5. After car years, everything will be parameterized. On track - not blocked, just competing obligations.

6. Called for thoughts, suggestions, insights - none presented

III. Adjournment - Meeting adjourned at 1:11pm.
