Meeting ID: 790 499 9331

Antitrust Policy Notice

Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at <http://www.linuxfoundation.org/antitrust-policy>. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrave of the firm of Gesmer Updegrave LLP, which provides legal counsel to the Linux Foundation.

Attendees:

- Sean Bohan (openIDL)
- Peter Antley (AAIS)
- Ash Naik (AAIS)
- Brian Mills (AAIS)
- Chris Reed (Non Profits Insurance Alliance)
- Joseph Nibert (AAIS)
- Ken Sayers (AAIS)
- Margo (Hanover)
- Faheem Zakaria (Hanover)
- David Reale (Travelers)
- Yanko Zhelyazkov (Senofi)
- Mason Wagoner (AAIS)

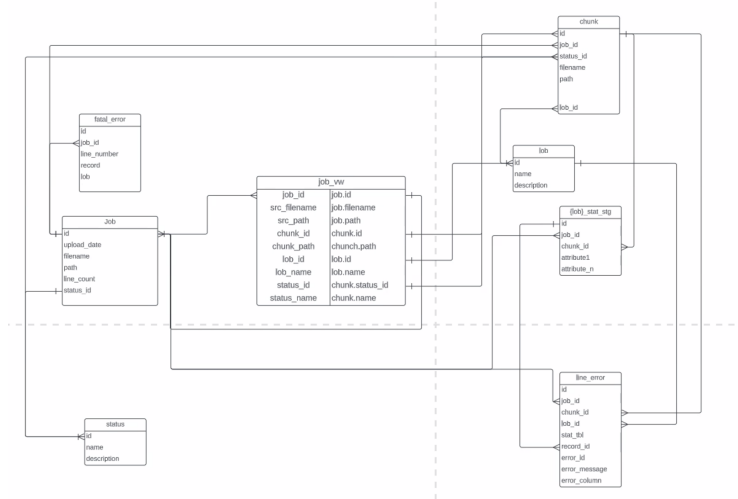

Agenda:

- MS Hurricane Zeta POC Architecture Discussion (KenS) (NO CHANGE)
- Update on openIDL Testnet (Jeff Braswell)
- IWG update (YankoZ)
- Update on RRDMWG and internal Stat Reporting with openIDL (Peter Antley)

- OLGA: Updates and Discussion Points
- AOB:
- Future Topics: Next Week Architecture Decisions for OLGA (originally planned for this week)

Notes:

- OLGA - working on the Extraction Pattern
- current reports - 1 year
- reports using, broke coverages
- nicer report created 2 years ago
- new team member added
- at QA stage with homeowners
- Get residential property into QA in June
- SQL plan for July - get into commercial lines
- status of test data from some carriers for the end to end testing
- data is seed for test data to develop larger, multi-year report
- entering into NodeBuilder
- data delivered, calc earned prem and car years, have EP to account that
- maintain as a checkmark status
- Dir of Actuarial says it is good, moving forward
- after nodes set up, look at what it takes
- means to show things can be done
- test data from 2020 - just turned in reports from 2020
- behind, but still correct in reporting cycle
- another question re: OLGA, capture today and next week lay out different decisions

- planning out API
- what we need is a "job view"
- will give you meta data when it comes to an operating react app
- filling out landing page
- job view: job id, source file name, source file path, chunk ID, chunk path etc.
- had the
- openiDL using distributed system to facilitate, doing RegReporting, carriers get to keep data on their systems and provide summary info as opposed to now giving to AAIS, houses data, produces reports and data clls on their behalf
- more control, participate in data calls cheaper
- use of differential privacy or homomorphic encrypt to protect data OR
- does this go to AAIS and they gate it to the regulator
- no location specific or PII info

- Routes
1. Job VW

a. Get

2. {job}_stat_data

a. Get

b. Patch

3. Job

a. Summary

i. Get - Summary Data

b. Data

i. Post - File Upload

c. Submit

i. Post - Submit Data/Archive File

d. Discard

i. Delete - Delete Local Data/Discard File

4. Validations

a. event

i. Post - Start Validation Event

ii. Get - Get Validation Engine Status
