Antitrust Policy Notice

Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at <http://www.linuxfoundation.org/antitrust-policy>. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

Announcements

In advance, we'd ask of the community any items the TSC should consider be submitted through the Wiki or directly to the TSC members, or in this forum and they will be added. Items we'd like to ensure the TSC and technical community aware of include:

- Features or Bugs technical concerns in the openIDL technology
- Operational or logistical challenges in learning or deploying the technology
- Opportunities for integration, feature development or constituencies that will further the technology or add value to stakeholders
- New Organization Types, Roles, Users or Operations
- News, information or resources to consider in planning openIDL technology
- Sharing successful or challenging individual experiences or interactions with our constituencies
- Relevant and appropriate ideas, jokes, anecdotes and/or memes (fun stuff)

Please review the following resources for background and common reference:

- a. openIDL website: <https://www.openIDL.org>
- b. openIDL Wiki: <https://wiki.openIDL.org>
- c. Wiki TechDocs: <https://wiki.openidl.org/display/TDOCS>
